The Wireless Temperature Sensor is a general-purpose sensor found in many science labs. With a rugged, waterproof design and a long-lasting battery, students can spend more time collecting data and less time dealing with equipment.

WHAT'S INCLUDED

1x Coin cell battery

WHAT TO CONSIDER

Product Specifications

Approximate Mass	31 g
Range	-40 to 125°C
Resolution	0.01°C
Accuracy	±0.5°C
Maximum Sample Rate	10 Hz
Waterproof	IPX7 rated (1m for 30 min)
Probe material	Corrosion Resistant 316 Stainless Steel
Diameter	0.19 in (5.0 mm)
Length	4.5 in (115 mm)
Response Time	5 seconds to reach 63% of value in response to step change in temperature.
Connectivity	Bluetooth 5.2
Logging	Yes
Battery Type	Coin Cell

Battery & Logging

Stored Data Points Memory (Logging) [1]	>55,000
Battery - Connected (Data Collection Mode) [2]	>275 hr (2-3yrs of normal classroom use)*
Battery - Logging (Data Logging Mode) [3]	35 days
Battery Type	Coin Cell

[1] Minimum # of data points with all measurements enabled, actual results depend on enabled measurements.

[2] Continuous use in a connected state until battery failure, actual results will depend on sample rate, active measurements, and battery condition.

[3] Logging until battery failure, actual results will depend on sample rate, active measurements, and battery condition.

* Normal classroom use is the sensor in active use for 20min/lab for 120 lab periods/yr.
